Our key services offerings are to maximize benefits and help risk managing, deliver high performing innovative solutions and provide Cost effective solutions.

Custom Application Development

Software Application Outsourcing is one of the major operations of our company. Codex Tech-Solutions promises you functional and technical excellence in customized application development services. We have expertise in designing and implementing large complex, data-driven custom applications designed specifically for individual businesses in a wide range of domains.

Web 2.0 Application Development

We conceptualize, design, and develop Rich Internet Web 2.0 applications with unique and fully customized features with interactive interface focusing on user perspective. We engineer advanced integrated web solutions & client server applications with rich controls that include powerful data and multimedia capabilities.

This allows to present a versatile set of information in a high-quality interactive experience that collectively facilitates & accentuates information sharing and communication between users and applications and that can also be integrated with other Web 2.0 platforms like Facebook, Twitter, Four Square, Gowalla, You Tube, Blogs etc. Besides integration we have also developed a few social cause based networking sites mentored by the veterans of this industry. Codex Techalso has developed custom Content Management Systems (CMS) for its esteemed clients besides using WordPress, Joomla, Drupal, etc.

Mobile Application Development

Mobile phones have immensely increased the reach and effectiveness of businesses all across the world making everything available on your fingertips in no time.

We have a team of fanatical and skilled mobile application developers who work to congregate the prerequisites of our clients as per their requirements. We have designed and developed various customized & personalized business-centric, user-centric & gaming mobile applications with stunning features, rich graphical & user-friendly interface along with speedy processing of data for iPhone, iPad, Android and Windows Phone platforms. We also provide cross-platform mobile application development using PhoneGap, Titanium and Appcelerator that can save you time and money.

Database Applications

Codex Techsolutions as a company has years of experience in developing data intensive applications. We have handled large and complex databases having around 20 million of data. We have the experience in optimization of databases, data handling and data manipulation across heterogeneous platforms.

Web Designing

We design & develop high quality, unique, aesthetic, attractive and interactive websites using Clean Ajax, XHTML/ HTML/CSS, Adobe Fireworks, Dreamweaver, Photoshop, Adobe Flash, jQuery, Lightbox and Microsoft Silverlight technologies. This enables and helps our customers around the globe to leverage the web to engage visitors and meet their business goals that would create a lasting impression for their brand, or increase leads and sales. Our leading edge web sites are technically sound and flexible to interact seamlessly with identified target audience and other third party tools.

Business Intelligence And Analytics

We have gathered extensive experience in developing tools and solutions that transforms any business into a dynamic enterprise by actionable intelligence.

BI + Analytics = Enterprise Data Discovery

We deliver intelligent analytical applications and solutions to industries that process big data. Our solutions extend from modernization of legacy systems, apps for analytics and reporting to implementing new systems from scratch. We deliver value to our customers by leveraging the power of BigData, Cloud, Mobile and Social Media tools.

Our Expertise lies in:

Search Engine Optimization

Today SEO is a highly evolving business. Search Engine optimization is the sum total of all the processes which involve the promotion of any website in the results pages of the search engines like Google, Yahoo and MSN in a natural or a organic way.

Testing Services

Quality is the key to success in each and every business and is one of the important factors in evaluating the performance of any application. Information Technology Industry has high demand for quality services. Quality requirements can only be ensured by meticulous testing. Codex Tech has an honor of Testing the projects of our clients Search Help Inc. which got LISA Award for two successive years. See LISA Awards 2005 and 2006 for more details.
